DATA SHEET FOR SOLVENT RECOVERY AND GAS TREATMENT

CUSTOMER: _____						Page _____ of _____	
Production:						Date ----------	
Description							
Type of plant to be connected to the Omniatex SPA recovery plant:							
Air flow to be treated, m^3/h at °C			Room/machinery cubature, m^3				
Air temperature at plant inlet, °C			Site dry bulb, °C				
			Site wet bulb, °C				
			Site elevation above see, m				
Solvent mixture, % and name of the components			Formula				
			Formula				
			Formula				
Solvent making up the primary vapour/gaseous phase			Formula				
Primary gas/vapour concentration at average operating conditions	g/m^3		%				
By-products making up the polluting element entrained in the air flow, % and components name							
Approx. entrainment entity of the by-products, components name and g/m^3							
Quantity of other liquid, solid or gaseous substance entrained, name, g/m^3							
Air ducting to be connected to the Omniatex plant (existing or already designed), m	Diameter		Shape		Height		existing
	Material		Lenght		Quantity		designed
Standard to be applied to the plant, if any special requirement							
Material produced or working performed by the production line							
Consumption of solvent and other products per year, name and T/y							
Daily working time, shifts and cooling water recycling necessity	Hours		Shifts		Recycling		
Hours worked per year, heating medium type and specifications	h/y		Medium		Tech. data		
Other notes							

Degree: Name:

_____
